**Money Matters.**  
The condition of our money market has been very unsettled for some time. The banks discounting promissory notes at a high rate, and the banks holding the same at a low rate, have caused a great deal of business to be done. The demand for money has been very large, and the banks have been unable to supply it. The result has been a great deal of business done at a high rate, and the banks have been unable to supply it.
